

FERNS AND PETALS (FNP)

Sales Analysis — Executive Summary

Fiscal Year 2023 | Dataset: 1,000 Orders | Prepared: June 2026

₹3,520,984	1,000	5.53 Days	₹3,520.98
Total Revenue	Total Orders	Avg Delivery Time	Avg Order Value

1. Project Overview

Ferns and Petals (FNP) is a leading gifting platform in India, delivering occasion-based gifts across categories including flowers, cakes, sweets, soft toys, and more. This analysis examines 1,000 orders placed in 2023, covering diverse occasions such as Diwali, Raksha Bandhan, Holi, Valentine's Day, Birthdays, and Anniversaries. The objective is to surface actionable insights on sales trends, product performance, and customer behaviour to help FNP refine its growth strategy.

2. Key Financial Metrics

Total Revenue	₹3,520,984 across 1,000 orders in 2023
Average Order Value	₹3,520.98 per order — indicating a mid-to-premium spending segment
Average Delivery Time	5.53 days from order placement to doorstep delivery
Revenue per Category	Colors leads (₹10.06L), followed by Soft Toys (₹7.41L) and Sweets (₹7.34L)

3. Monthly Sales Performance

Revenue exhibited sharp seasonality across the year, with three distinct peaks:

- February (₹7,04,509) — highest single-month revenue, driven by Valentine’s Day gifting demand.
- August (₹7,37,389) — second-highest month, coinciding with Raksha Bandhan celebrations.
- November (₹4,49,169) — a secondary peak aligned with Diwali festival orders.
- Off-peak months (April, May, June, July, September, December) recorded revenues between ₹1.35L–₹1.58L, representing trough periods where promotional activity could drive uplift.

Strategic Implication: FNP should concentrate marketing spend in January–February and July–August, while deploying targeted promotions (loyalty rewards, bundle offers) during lean months to smooth revenue volatility.

4. Revenue by Occasion

Anniversary	₹6,74,634 — top-performing occasion (19.2% of total revenue)
Raksha Bandhan	₹6,31,585 — strong seasonal spike in August
All Occasions	₹5,86,176 — evergreen gifting (no specific occasion)
Holi	₹5,74,682 — festive demand in March
Birthday	₹4,08,194 — consistent year-round demand
Valentine's Day	₹3,31,930 — concentrated February spike
Diwali	₹3,13,783 — November festival

Anniversary and Raksha Bandhan together account for approximately 37% of total revenue, making them the highest-priority occasions for FNP’s product planning and marketing calendar.

5. Top Products by Revenue

The top five revenue-generating products for 2023 were:

- **Magnam Set** — ₹1,21,905
- **Quia Gift** — ₹1,14,476
- **Dolores Gift** — ₹1,06,624
- **Harum Pack** — ₹1,01,556
- **Deserunt Box** — ₹97,665

These five products collectively generated approximately ₹5.42 lakh, representing around 15.4% of total revenue. Their relatively narrow revenue spread (₹24K between top and fifth) suggests no single product is over-reliant; however, it also signals an opportunity to create a standout hero product with premium positioning.

6. Product Popularity by Occasion

Anniversary	Dignissimos Pack — most ordered product by quantity
Birthday	Ad Box — most popular for birthday celebrations
Diwali	Quisquam Pack — highest volume for Diwali gifting
Holi	Aliquam Box — top pick during Holi
Raksha Bandhan	Aperiam Box — #1 for Raksha Bandhan
Valentine’s Day	Voluptate Pack — most selected for Valentine’s Day

All Occasions

Fugit Set — best-selling across general gifting

These occasion-product pairings present a clear opportunity for FNP to curate targeted gift guides and featured collections on its platform homepage, driving conversion by reducing decision fatigue for shoppers.

7. Geographic Insights — Top Cities by Orders

The top 10 cities by order volume were Bareilly, Ghaziabad (9 orders each), Bhilai (8), and Sirsa, Khammam, Bulandshahr, Darbhanga, Pallavaram, Varanasi, and Ozhukarai (7 each). Notably, demand is distributed across Tier-2 and Tier-3 cities rather than being concentrated in metros.

Strategic Implication: This pattern suggests FNP's value proposition resonates strongly in non-metro India. Expanding delivery partnerships and logistics coverage in Tier-2/3 cities could yield significant order volume growth.

8. Order Timing & Delivery Performance

Orders were placed throughout the day with notable activity during late-night and early morning hours (midnight to 3 AM), reflecting FNP's 24/7 ordering capability and customers placing last-minute gift orders.

The average delivery time of 5.53 days applies uniformly across order quantities, indicating that higher quantity orders do not meaningfully impact delivery timelines within this dataset — a positive signal for operational scalability.

9. Strategic Recommendations

9.1 Maximise Peak Season Revenue

- Launch early-bird campaigns for Valentine's Day (January) and Raksha Bandhan (July) with curated gift sets and limited-edition packaging.
- Introduce pre-booking discounts and express delivery options for high-demand occasions.

9.2 Revitalise Off-Peak Months

- Deploy subscription gifting boxes (monthly / quarterly) to generate baseline revenue between October–December and April–June.
- Run loyalty reward campaigns in low-revenue months (April, May, September) with personalised offers.

9.3 Strengthen Tier-2/3 City Presence

- Partner with regional logistics providers to reduce delivery time to under 4 days in non-metro cities.
- Offer hyperlocal gifting options (same-day delivery for select categories) in high-demand Tier-2 cities.

9.4 Product & Category Strategy

- Invest in the Colors category (top revenue generator) with new SKUs, seasonal variants, and gifting bundles.
- Develop a premium 'Signature' product line priced 20-30% above current top sellers to raise average order value.
- Create occasion-specific landing pages highlighting the top product per occasion identified in this analysis.

9.5 Customer Experience & Retention

- With an average order value of ₹3,521, introduce a tiered loyalty programme rewarding repeat purchasers with points redeemable against future orders.
- Send personalised reminders ahead of key occasions (anniversaries, birthdays) using customer order history data.

10. Conclusion

FNP's 2023 performance demonstrates a healthy revenue base of ₹35.2 lakh with strong seasonal demand tied to gifting occasions. Anniversary and Raksha Bandhan are the anchor occasions driving nearly two-fifths of total revenue. The Colors and Soft Toys categories dominate, while demand is spread broadly across Tier-2/3 Indian cities.

By doubling down on peak-season campaigns, expanding in high-growth non-metro markets, and introducing loyalty mechanics to retain the existing customer base, FNP is well-positioned to scale revenue by 20–30% in 2024.
